I. INTRODUCTION

I. INTRODUCTION

The state of North Dakota is facilitating the design of the Criminal Justice Information Sharing (CJIS) architecture. This statewide planning effort will integrate the separate state and local computer systems that support the state's criminal justice system. Specific goals of this effort include:

- Define the information sharing needs of North Dakota criminal justice agencies.
- Develop a conceptual design for technologies to support information exchange.
- Develop data standards for information that is shared among criminal justice agencies.
- Identify and plan the implementation of high-priority CJIS projects.

The CJIS planning framework is supported by an established baseline set of data standards and information exchanges that will assist local and state agencies in defining information commonly so that it can be exchanged.

The approach utilized to determine the data elements and relationships necessary to support CJIS business requirements involved establishing business requirements and data element standards, then defining, consistent with the standards, the data elements necessary to satisfy the requirements. These data elements were then checked to ensure that they would meet the requirements. Determining the shareable data elements currently in use by CJIS organizational entities and verifying the newly defined standard data elements will allow for the interchange of that information with other organizational entities. The detailed steps taken in this approach are described below and provide the background necessary for understanding the contents of this document.

This document is presented in four volumes because of its size. Volume I contains data standards, framework, strategic data model, and entity relationship diagrams (ERDs). Volume II presents the data elements of the North Dakota Department of Corrections offender-based tracking system, TAG, and shows how those elements relate to the data dictionary presented in Volume I. Volume III presents the data element dictionary. Finally, Volume IV presents data element summaries and transaction data element summary information.

A. DEFINED REQUIREMENTS

Basic requirements were determined through identification of North Dakota state and local criminal justice agencies, as well as other stakeholders, that have a need to share data with criminal justice

agencies. These requirements will be refined through evaluating specific agency practices and existing systems as this planning project progresses.

B. DETERMINED MESSAGING AND NAMING STANDARDS

Standards for message formatting and data element naming were determined by reviewing XML data standards, as well as other established data architecture standards. Standards that would support message transmission via XML were selected. The CJIS data element naming standards are detailed in Section II.

C. DETERMINED RELATIONSHIPS

The major CJIS subject areas, or meta-relations, were determined through evaluation of the criminal justice process. These are provided in Section III of this document. Each of these meta-relationships was broken down into an ERD that shows how entities and their respective attributes are related. These ERDs are provided in Section IV.

D. DEFINED STANDARD DATA ELEMENTS

Specific data elements required to satisfy CJIS business requirements were determined based on the attributes defined in the previous steps. The specific name, format, and codes for each data element were determined by reviewing the use of the element and the standards. These standard data elements form the basis for the CJIS Data Element Dictionary and are listed in Section V of this document.

II. DATA ARCHITECTURE FRAMEWORK

II. DATA ARCHITECTURE FRAMEWORK

A. DATA DICTIONARY STANDARDS

In order to define the data elements within the CJIS Data Element Dictionary, a number of message-related data standards must first be defined. These standards identify the content and structure requirements necessary to uniformly transmit data electronically in a meaningful way between two trading partners. Data-oriented standards required to support the messaging environment include:

- Character Set
- Data Elements
- Data Types
- Composite Data Elements

Each of the above data definition components is defined in detail below.

1. Character Set

All data element values shall be constructed using both the basic character set and the extended character set. The basic character set is used for all data elements, except for those defined with the variable character data type.

■ Basic Character Set

The basic character set consists of uppercase letters (A to Z), digits (0 to 9), special characters, and the space character. The special characters are the following:

! " & ' | * () + , - . / : ? =

■ Extended Character Set

An extended character set may be used for variable-length fields. The extended character set includes those characters in the basic character set, lowercase letters (a to z), and additional special characters. The additional special characters are the following:

% @ [] _ { } \ | < > ~ # \$

2. Data Elements

The data element is the smallest named unit of information in the standard. Data elements are identified as either simple or component. A data element that occurs as an ordinary positioned member of a composite data structure is a component data element. A data element that occurs in a segment outside the defined boundaries of a composite data structure is a simple data element.

3. Data Types

A data element data type defines the kind of information stored in a particular data element. Data element types and length characteristics are based on the ANSI X12.6 EDI Application Control Structure standards and are described below.

■ Numeric (NUM)

A numeric data element is represented by one or more digits with an optional leading sign representing a value in base 10. It is used when the position of the decimal point within the data is permanently fixed and is not to be transmitted with the data. Leading zeros are omitted when transmitting data.

■ Decimal Number (DEC)

A decimal data element contains an explicit decimal point and is used for numeric values that have a varying number of decimal positions. The decimal point always appears in the character stream if it is at any place other than the right end of the screen. If the value is an integer, the decimal point should be omitted. For negative values, the leading minus sign is used. Leading zeros are omitted when transmitting data.

■ Fixed Character (CHAR)

A fixed-length character string is a sequence of any uppercase characters from the basic character set. This data type should be space-filled to satisfy length. Significant data should be left-aligned.

■ Variable Character (VARCHAR)

A variable-length character data element is a sequence of uppercase and lowercase characters from the extended character set, and it contains at least one nonspace character. The significant characters shall be left-aligned. Leading spaces, when they occur, are presumed to be significant characters.

- Date (DATE)

A date data element is used to express the standard date in CCYYMMDD format in which CC is the century, YY is the year, MM is the month, and DD is the day.

- Time (TIME)

A time data element is used to express the time in HHMMSSd...d format in which HH is the hour for a 24-hour clock, MM is the minute, SS is the second, and d...d is decimal seconds. The numbers are left-aligned, and seconds and decimal seconds are optional.

4. Composite Data Elements

The composite data structure is an intermediate unit of information in a segment. By definition, a composite data structure consists of two or more component data elements preceded by a data element separator. Each component data element within the composite data structure, except the last, is followed by a component element separator.

B. DATA ELEMENT NAMING GUIDELINES

Data element name standards apply to all data identified in the CJIS Data Dictionary. The names used in these standards are the full-word, fully spelled names that are contained in the data dictionary. Each data element name consists of three constructs in the order presented below:

- *A prime word designator.* Prime words identify business information objects (or entities) to which the data element (or attribute) belongs (e.g., Person). A data element name must begin with at least one prime word.
- *Modifier words or adjectives.* These words further describe the data element (e.g., Last). Modifier words are optional.
- *A class word designator.* A class word designator categorizes or classifies a data element according to its use in business processes or procedures (e.g., Name). A data element name must end with a class word. Class word designators are further described below.

These naming guidelines provide for simple identification of the position and role of each data element within the CJIS data architecture.

C. CLASS WORDS

Class words further define the type of data maintained within a data element. They are global descriptors that assist the reader in understanding the format and content of the data in a data element. All of the data element names have been suffixed by one of the following class words:

Class Word: **CODE**

Examples: State Code

Definition: Identifies classifications, categories, or types of data (such as male, female, other). This class word can also contain abbreviations.

Explanation: Exceptions to this rule can be made. Codes that are limited in number and unlikely to change can be given any suitable number of positions and can embed meaningful values. For example:

PERSON GENDER CODE CHAR(1)

Values: F=Female, M=Male

Format: CHAR(1)...CHAR(9).

Class Word: **COUNT**

Examples: Agency Population Count

Definition: The total number of units or quantity (including fractions) of anything except monetary amounts.

Explanation: All fields used for tallying or representing a quantity shall be signed if negative. A signed counter is necessary in the event of a negative tally from an arithmetic operation. For example, a negative on-hand quantity of an item could occur from a faulty prior inventory or shrinkage (theft).

Format: NUMERIC(1-255,0)

Class Word: **DATE/TIME**

Examples: Arrest Date/Time

Definition: A point in time expressed in CENTURY, YEARS, MONTHs, DAYs and time denoted in a military time format.

Explanation: All date fields will be in Gregorian (not Julian) format and will accommodate (from left to right) a two-digit century, two-digit year, two-digit month, and

two-digit day. Configuring all date fields in this way avoids turn-of-the-century conversion errors. This format also can facilitate date sort processing because all date fields are in collating sequence. As with date fields, if time is represented with a format of HHMMSS, it is in a natural collating sequence. TIME data elements can have four, six, or eight digits.

NOTE: This format would apply to intersystem transactions, not necessarily to presentation formats.

Format: DATE and TIME

Class Word: **DAYS**

Examples: Jail Time Suspended Days

Definition: A duration or quantity of time measured in terms of days.

Explanation: DAYS is used to represent the increment of 24 hours from any start time, not specific to a month or year.

Format: NUMERIC(1-255,0)

Class Word: **DAY**

Examples: Meeting Day

Definition: The standard abbreviation for the name of a day of the week.

Explanation: None.

Format: CHAR(3)

Class Word: **DESCRIPTION**

Examples: Agency Description

Definition: Data having undefined, free-form, unstructured, or unformatted content that is used to describe another item of information and that is not an address or name.

Explanation: Generally used within a lookup table to explain the meaning of a code. For example, the PLACE OF BIRTH table has two data elements, CODE and DESCRIPTION.

Format: VARCHAR

Class Word: **HOURS**

Examples: Unit of Service Hours

Definition: A duration or quantity of time measured in units of hours.

Explanation: None.

Format: NUMERIC(1-255,0)

Class Word: **FLAG**

Examples: Person Circumcision Flag

Definition: An indicator that identifies whether a condition exists or is undefined. Compare with INDICATOR.

Explanation: A data element with the FLAG class word is a one-character field that contains an X if the condition exists or is null if the condition is not known.

Format: CHAR(1)

Class Word: **INDICATOR**

Examples: Multiple Clearance Indicator

Definition: Used to indicate one of three possible conditions or states. Contrast with FLAG or CODE.

Explanation: An indicator represents a binary condition with the capability of marking a nonresponse as “unknown.” Only one of the three values, if specified, is permitted, as explained below.

Values: N = No, Y = Yes, Null = Unknown

Format: CHAR(1)

Class Word: **MINUTES**

Examples: Arrival Time Minutes

Definition: A duration or quantity of time measured in units of minutes.

Explanation: None.

Format: NUMERIC(1-255,0)

Class Word: **MONEY**

Examples: Sentence Suspended Money

Definition: The quantity of monetary amounts.

Explanation: All dollar amounts should always be signed. This will reduce confusion and conversion between signed and unsigned fields and will avoid truncation and error if an arithmetic operation results in a negative amount that is moved to an unsigned field. An 11-position field will allow for the storage of up to \$999 million. This will provide for significant growth and (hopefully) all future rates of inflation.

Format: NUMERIC(11,2)

Class Word: **MONTHS**

Examples: Jail Time Suspended Months

Definition: A duration or quantity of time measured in units of months.

Explanation: None.

Format: NUMERIC(1-255,0)

Class Word: **NAME**

Examples: Person Name

Definition: A word or phrase that constitutes the distinctive designation of a person, place, or thing.

Explanation: None.

Format: VARCHAR

Class Word: **NUMBER**

Examples: Fingerprint Card Number

Definition: A numeral or combination of numerals, letters, or other symbols used to identify something.

Explanation: None.

Format: VARCHAR (length defined by data element)

Class Word: **PERCENT**

Examples: Breathalyzer Test Percent

Definition: A number that represents a ratio between two quantities or the result of an arithmetic division.

Explanation: All percentage fields will be expressed as 9.9999, where 1.0000 = 100 percent and 0.0750 = 7.5 percent. By representing all percentage fields using the same format, truncation, rounding, and conversion errors can be minimized.

Format: DEC(6)

Class Word: **RATIO**

Examples: Jail Bed Ratio

Definition: A number that represents the relative size of two quantities expressed as the quotient of one divided by the other.

Explanation: None.

Format: DEC(8)

Class Word: **SECONDS**

Examples: Response Seconds

Definition: A duration or quantity of time measured in units of seconds.

Explanation: None.

Format: NUMERIC(1-255,0)

Class Word: **TELEPHONE**

Examples: Agency Telephone

Definition: Identification of a telephone number.

Explanation: Includes area code. No formatting characters are stored.

Format: CHAR(10)

Class Word: **TEXT**

Examples: Incident Text

Definition: Data having undefined, free-form, unstructured, or unformatted content and that is not an address or name. Contrast with NAME, DESCRIPTION, and ADDRESS.

Explanation: None.

Format: VARCHAR

Class Word: **VALUE**

Examples: Property Value

Definition: The value of an item in monetary amounts.

Explanation: All dollar amounts should always be signed. This will reduce confusion and conversion between signed and unsigned fields and will avoid truncation and error if an arithmetic operation results in a negative amount that is moved to an unsigned field. An 11-position field will allow for the storage of up to \$999 million. Contrast with MONEY.

Format: NUMERIC(11,2)

Class Word: **YEAR**

Examples: Vehicle Model Year

Definition: An identifier that describes the particular calendar year an item was made or an event occurred.

Explanation: Year is four positions to accommodate a two-digit century. For use if only a year needs to be specified, without any other date information. See DATE.

Format: NUMERIC(4); format is CCYY

Class Word: **YEARS**

Examples: Prison Time Years

Definition: A duration or quantity of time measured in units of calendar years, or 365 days.

Explanation: None.

Format: NUMERIC(1-255,0)

III. STRATEGIC DATA MODEL

III. STRATEGIC DATA MODEL

The CJIS strategic data model provides an overview of the data meta-relations, or major data subject areas, developed with analysis of related criminal processing events and related processing source documents. The enterprise-wide model serves as a resource for development of detailed logical data models related to the identified meta-relations, such as Criminal Incident, which may be used to implement new data repositories or modifications to existing databases to support future information requirements. The strategic data model may additionally serve as a resource in development of future criminal justice system interfacing and development within the state.

EXHIBIT III-1 – Meta-Relations, which follows this section, presents the basic structure of the strategic data model. The model is based upon a hierarchy of data definition areas that provide the basis for identification and definition of information collected and utilized during the criminal justice process.

- *Primary Meta-Relations* – The top level of the model identifies and defines the three primary components of data collection – person, place, or thing. The fundamental data entities and relationships for each area are constructed at this level.
- *Secondary Meta-Relations* – The secondary level of the model identifies and defines supportive data components that are used within the criminal justice process with the primary components. It identifies the data entities and relationships required to support the criminal justice process and relates them to the primary components defined above.
- *Primary Event Meta-Relations* – The last level of the model is for the sequential primary events that occur within the criminal justice process. These events allow for presentation of the information collected and utilized at their respective stages within the process.

These three levels of meta-relations provide the basic framework for development of entity-relationship models and identification of the data attributes that are the foundation of the data element standards defined later in this document.

A. PRIMARY META-RELATIONS

The primary meta-relations are the foundation upon which all other information is based. Each criminal justice process documents the information and decisions created or utilized when a person, location, or property item is involved in an event or occurrence. The primary meta-relations are:

- Person

The person meta-relation contains information about people and their roles and/or relationship to the criminal justice process. It identifies and defines the various types of people involved in the criminal justice process (official, witness, suspect, etc.). It also identifies and defines the relationships between the types of people.

- Location

The location meta-relation contains information about physical locations across the state. A location is a specific place in a facility at a given address or locale. The location meta-relation is where relationships between a place, city, county, and state are defined.

- Property Item

The last primary meta-relation is for things involved in the criminal justice process. Property items include guns, vehicles, boats, securities, and other items that may be related to a criminal case.

B. SECONDARY META-RELATIONS

Between the primary meta-relations and events are a number of secondary meta-relations that are necessary to capture and understand the criminal justice process. The secondary meta-relations are:

- Organization

The organization meta-relation is for the agencies involved in the criminal justice process, which include law enforcement, judicial, and correction organizations at both the state and local level.

- Law

The law meta-relation is for the authority or powers given certain organizations to arrest, prosecute, and adjudicate persons involved in the criminal justice process. The relationships between state laws and local ordinances are defined.

- Jurisdiction

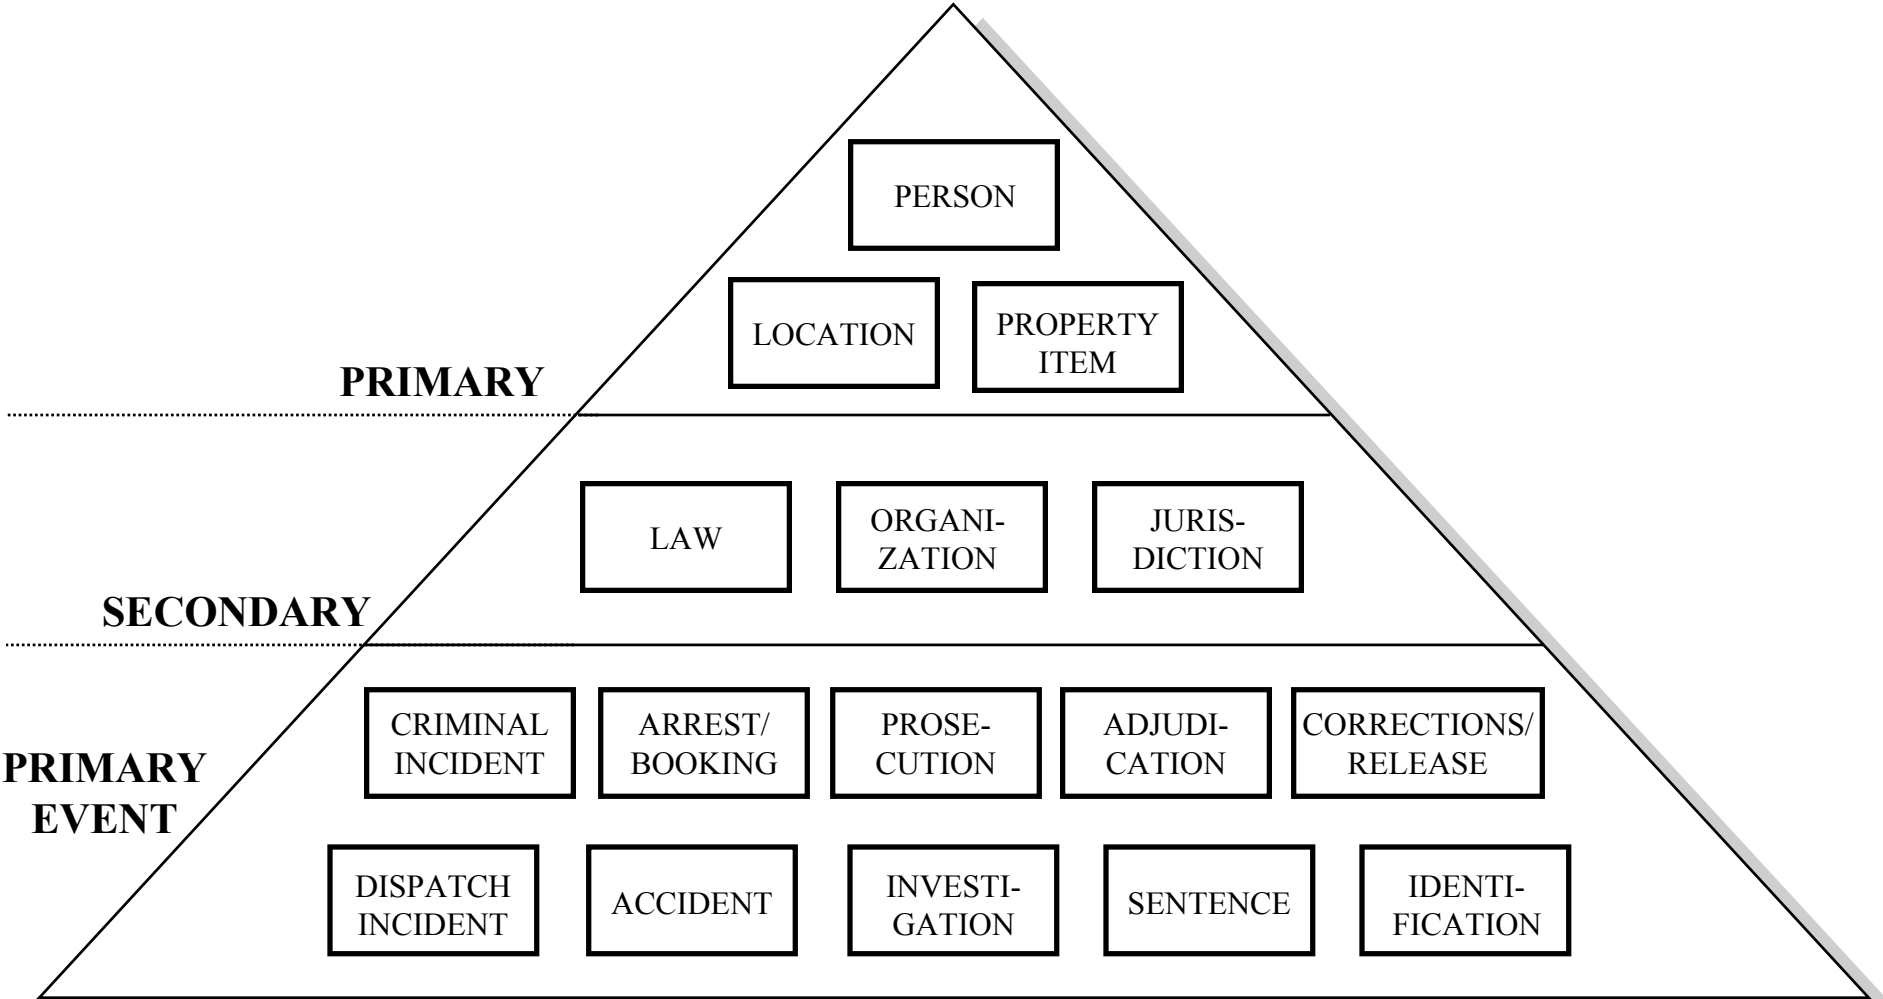

The jurisdiction meta-relation outlines the relationships between organizations, laws, and persons.

C. PRIMARY EVENT META-RELATIONS

To complete a strategic data model, it is necessary to understand the primary processing events related to the analyzed data. Documenting the events helps to group information requirements into additional meta-relations and identify fundamental entities. These events are shown in EXHIBIT III-I.

META-RELATIONS

IV. ENTITY RELATIONSHIP MODELS

IV. ENTITY RELATIONSHIP MODELS

Given the strategic data model described in the previous section, the system's detailed information requirements can be recorded and analyzed using ERDs. This section describes the contents of an ERD and the conventions used in this document, then presents an ERD for each of the primary, secondary, and primary event meta-relations described in the strategic data model.

A. CONVENTIONS

This section describes the components of an ERD and the ways in which those components are depicted.

1. Entities

An entity, sometimes referred to as an object, is a thing. It represents something tangible, a role someone plays, an event, or an interaction. The entities found in the ERDs are not physical and are relevant to business purposes and use, independent of technology or physical implementation. Each occurrence of an entity can be uniquely identified through one or more of the entity's attributes or properties. Attributes generally represent single facts or elements describing an entity. An attribute represents the most elementary unit of information within a logical data model.

The ERD may contain three types of entities: fundamental, associative, and attributive.

- A fundamental entity is the most common type of entity in an ERD and describes a base entity that depends on no other entity for its existence. For example, the PERSON entity, which describes a person, is dependent on no other entity. It is referenced by other entities. In the ERD, a fundamental entity is denoted by a box with squared corners.
- An associative entity describes the relationship between two entities and data attributes maintained about the relationship. This type of entity is used to resolve any many-to-many relationships. An example is the association of offenses to a court case. Besides the relationship of a standard offense to a case, an additional attribute may be the date of association. The resulting associative entity would be COURT CASE OFFENSE, with relationships to COURT CASE and OFFENSE. An associative entity is dependent on other entities for its existence. A dependent entity is denoted in the ERD by a box with rounded corners.
- The attributive entity is used to resolve any repeating attributes. In order for a logical data model to be normalized, no attribute may occur multiple times when describing an entity.

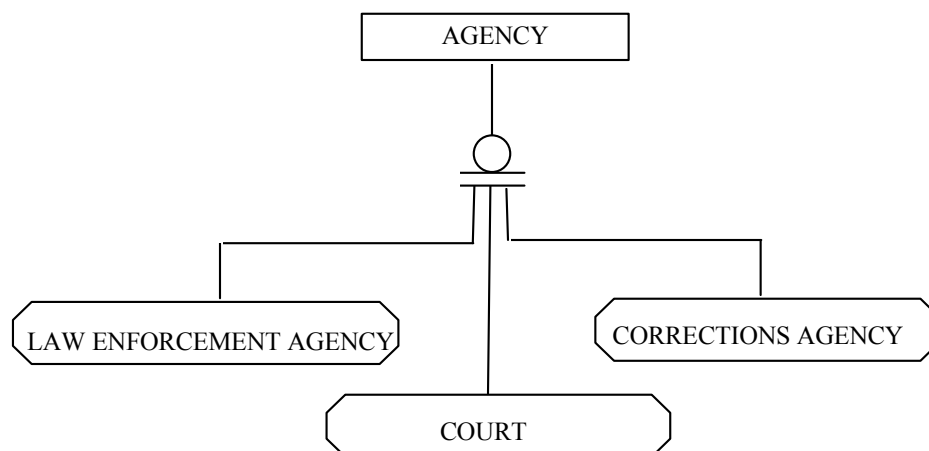

When describing a PERSON, it is known that he or she may have multiple SCARS, MARKS, and TATTOOS. An attribute should not be defined in PERSON; rather an attributive entity would be created called PERSON SCARS, MARKS, TATTOOS. The entity would occur zero-to-many times for one PERSON. An attributive entity is dependent on other entities for its existence and is denoted in the ERD by a box with rounded corners.

Primary Keys

Each entity identified within an ERD must have an attribute or set of attributes used to identify an entity occurrence. Most commonly, this is an identification number or code. Identifying the primary or access key for an entity helps to determine what entities exist in a model and what entities are actually attributes within a different entity or a subtype entity. For associative entities, entities defining the association of two other entities, the primary key is made up of foreign or reference keys associating two or more entities. An attributive entity usually contains the primary key of the associated fundamental entity and a token sequencing attribute or time-stamp.

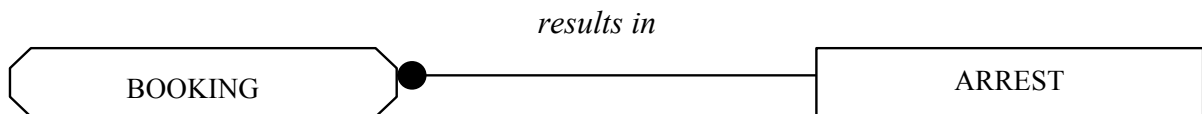

Subtypes

An entity may have an identifiable set of subtypes. In this relationship, which is depicted below, an entity has a key and attributes; one of these attributes denotes the subtype to which the record refers. In the example, the entity AGENCY would have an attribute that distinguishes which subtype to which the record applies. An occurrence of AGENCY would include information pertaining to the agency, such as agency name, as well as information specific to the subtype. For example, if the record referred to a court, the record would include the basic agency information, as well as information that applies only to a court. The agency and the court entities would have the same primary key.

2. Relationships

An ERD comprises entities and relationships between the entities. Below is an example of two entities with a relationship. An entity is represented by a box with the entity name, and relationships are shown by lines connecting entities with a verb phrase describing the relationship. The relationship of the entities is read from the “parent” entity to the “child” entity, which is identified by a solid dot at the child entity end of the relationship line. In the example, one ARREST “results in” zero-to-many BOOKINGS.

In the example above, the relationship is an *identifying* one because the child record cannot be uniquely identified without information from the parent. This fact is denoted by the solid line connecting the entities. A nonidentifying relationship, in which the child record can be uniquely identified without information from the parent entity, is denoted with a dashed line with a diamond at the parent end.

Cardinality

The cardinality of a relationship indicates how many times the relationship can occur between the two entities. In the models, each relationship is denoted at the child end of the relationship line:

- “1” means the relationship is one-to-one.
- “P” means one to one or many.
- “Z” means one to zero or one.
- No indication of cardinality means the relationship is one to zero, one or many.

With a zero cardinality in the relationship, the relationship is optional. If the cardinality includes a maximum of “many,” then multiple occurrences of the related entity may contain multiple occurrences that reference the main entity. For example, an INDIVIDUAL may have many ARRESTs, resulting in the relationship “is the subject of zero-to-many.”

B. ENTITY RELATIONSHIP DIAGRAMS

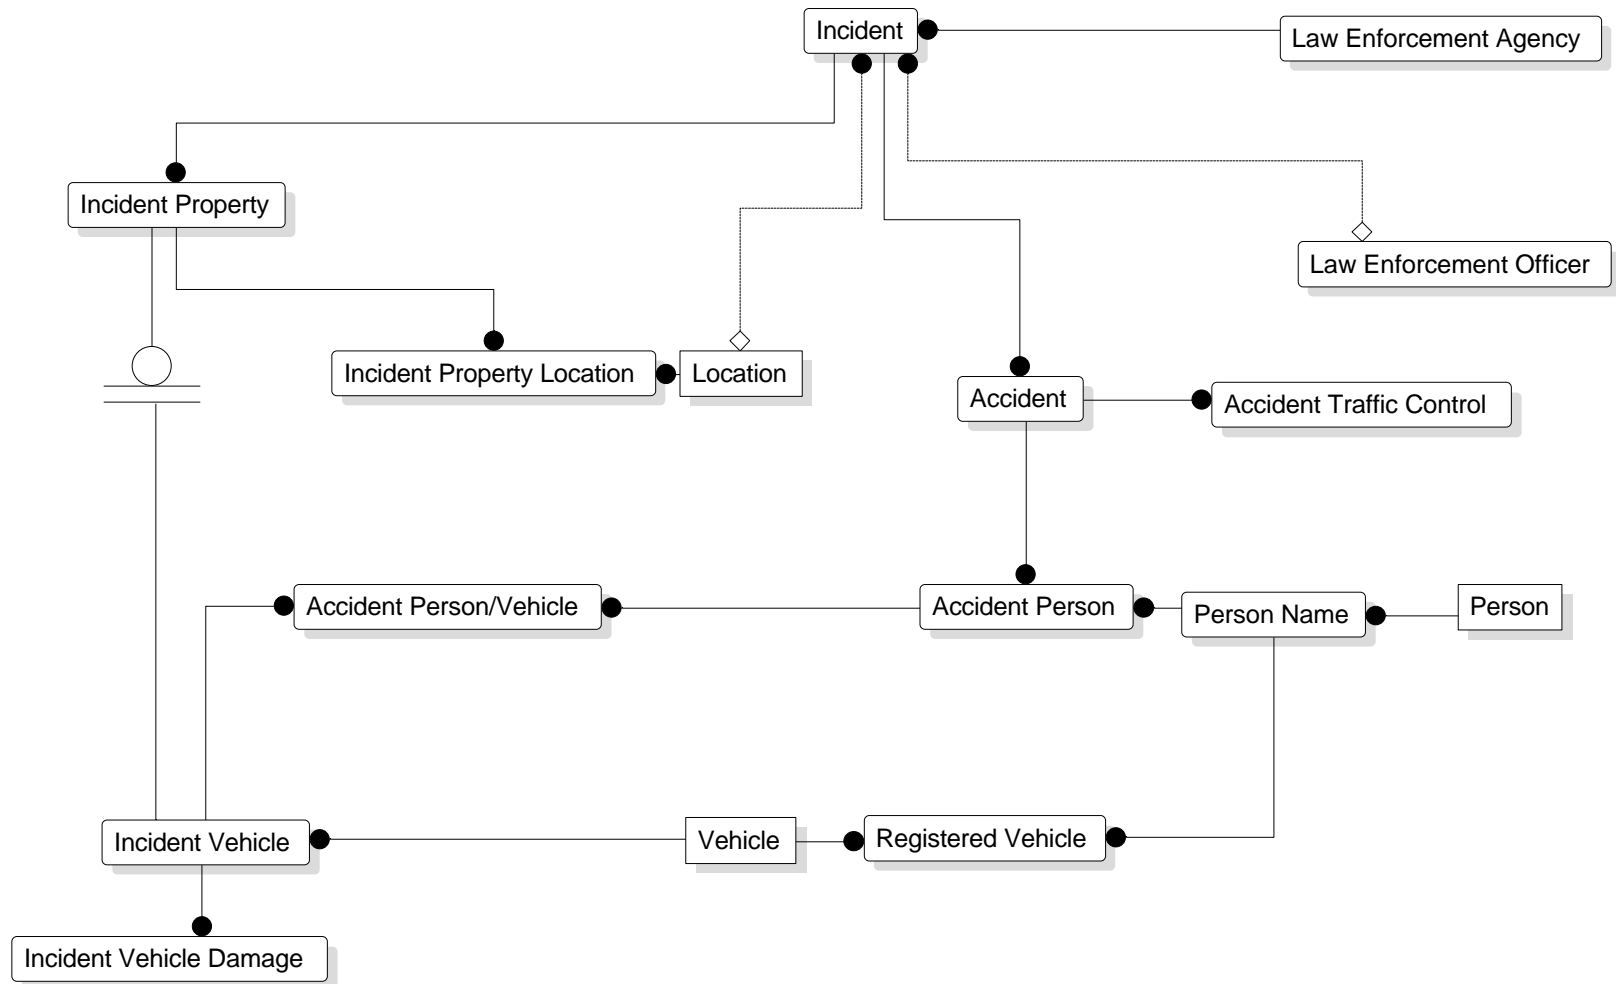

The following pages contain a series of ERDs that present the relationships between CJIS entities necessary to satisfy business requirements. An ERD is presented for each of the primary, secondary, and primary event meta-relations described in the strategic data model.

EXHIBIT IV-1, which follows the ERDs, is a table that provides information specific to each entity referenced in the ERDs. For each entity, the following information is provided:

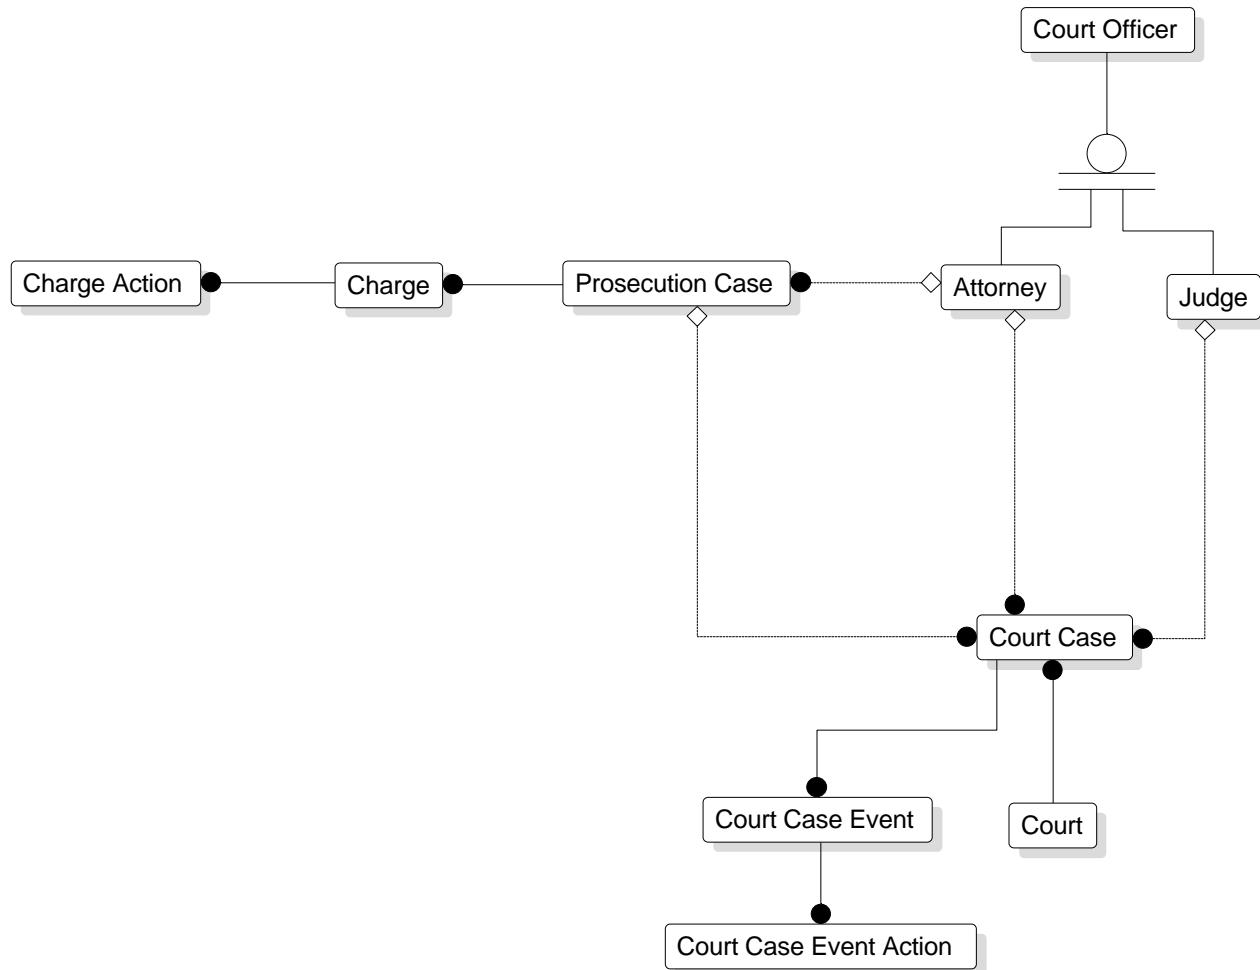

- *Definition.* This explains the basic information conveyed by the entity.
- *Primary Key(s).* The attributes contained in the entity that uniquely identify the entity. Every entity will have at least one key.
- *Attribute(s).* The individual pieces of information contained in the entity. An entity may contain no nonkey attributes. In this case, the entity simply joins information from other entities as indicated by the primary keys.

Attributes (including keys) that contain a hyphen are “foreign” to the entity in that they reference an attribute contained in another entity. A foreign key is an attribute that completes a relationship by identifying the parent entity. Foreign keys provide a method for maintaining integrity in the data (called referential integrity) and for navigating between different instances of an entity.

ENTITY DEFINITIONS

Entity Definitions, Keys, and Attributes

ACCIDENT

Definition: Information regarding an accident involving at least one vehicle.

Primary Key(s):

Accident Number

Accident – Incident Number

Accident – Organization ID Number

Accident – Agency ORI Number

Attribute(s):

Accident Scene Investigation Indicator

Accident Severity Code

Accident Surface Condition Code

Accident Rescue Unit Count

Accident Photograph Taken Indicator

Accident Median Type Code

Accident Time

Accident Date

Accident Temperature Measure

Accident Weather Condition Code

Accident Report Date

Accident Zone Type Code

Accident State Code

Accident Alcohol Indicator

Accident Light Condition Code

Accident Hit Run Indicator

Accident Investigation Complete Indicator

Accident Description

Accident Engineering Study Required Indicator

Accident Fatality Indicator

Accident Environmental Factor Code

ACCIDENT PERSON

Definition: Information regarding a person involved in an accident.

Primary Key(s):

Accident Person – Incident Number

Accident Person – Person Name Sequence Number

Accident Person – Person Sequence Number

Accident Person – Agency ORI Number

Accident Person – Organization ID Number

Accident Person – Accident Number

Attribute(s):

Accident Person Role Code

Accident Person Restraint Code

Accident Person Helmet Indicator

Accident Person Transported Code

Accident Person Seat Position Code

Accident Person Body Region Code

Accident Person Pedestrian Location Code

Accident Person Pedestrian Condition Code

Accident Person Human Factor Code

Accident Person Pedestrian Action Code

Accident Person Insured Indicator

Accident Person Injury Severity Code

Accident Person Ejection/Trapped Code

Accident Person Driver's Report Exchange Indicator

Accident Person Driver Condition Code

Accident Person Citation Issued Indicator

Accident Person Blood Alcohol Percent

ACCIDENT PERSON/VEHICLE

Definition: This entity associates persons and vehicles associated in an accident.

Primary Key(s):

Accident Person/Vehicle – Accident Number

Accident Person/Vehicle – Incident Number

Accident Person/Vehicle – Agency ORI Number

Accident Person/Vehicle – Person Name Sequence Number

Accident Person/Vehicle – Property Sequence Number

Accident Person/Vehicle – Person Sequence Number

Attribute(s):

Accident Person/Vehicle Role Code

ACCIDENT TRAFFIC CONTROL

Definition: Information regarding traffic controls at the scene and time of an accident.

Primary Key(s):

Accident Traffic Control Sequence Number

Accident Traffic Control – Agency ORI Number

Accident Traffic Control – Accident Number

Accident Traffic Control – Incident Number

Attribute(s):

Accident Traffic Control Code

Accident Traffic Control Operational Indicator

ADDRESS

Definition: Postal address information for a specific location.

Primary Key(s):

Address – Location Sequence Number

Attribute(s):

Address Building Suffix Number

Address Complete Street Address

Address Occupancy Type Code

Address Type Code

Address NIBRS Premise Code

Address Building Name

Address Unit Number

Address Street Number

Address Postal Code

Address Half House Number Flag

Address Post Office Box Number

AGENCY

Definition: A state or local government criminal justice agency.

Primary Key(s):

Agency ORI Number

Agency – Organization ID Number

Attribute(s):

Agency – Organization ID Number

Agency – County Code

Agency – City Name

Agency – State/Province/Country Code

Agency Regional System Code

Agency District Code

Agency Civilian Female Count
 Agency Civilian Male Count
 Agency Sworn Female Count
 Agency Report Media Type Code
 Agency Jurisdiction – Law Sequence Number
 Agency ID Number
 Agency UCR Representative Name
 Agency Origination Code
 Agency Classification Code
 Agency Sworn Male Count
 Agency Population Count
 Agency Type Code
 Agency Administrator Name
 Agency Name
 Agency Mnemonic Code

AGENCY DEPARTMENT

Definition: A department of a specific agency.

Primary Key(s):

Agency Department Code
 Agency Department – Agency ORI Number

Attribute(s):

Agency Department Name

AGENCY EMPLOYEE

Definition: AN employee of a specific agency.

Primary Key(s):

Agency Employee – Agency ORI Number
 Agency Employee – Identified Person SID Number

Attribute(s):

Agency Employee Type Code

ARREST

Definition: An arrest made by a law enforcement agency.

Primary Key(s):

Arrest Number
 Arrest – Agency ORI Number

Attribute(s):

Arrest – Person Name Sequence Number
 Arrest – Person Sequence Number
 Arrest – Identified Person SID Number

Arrest – Location Sequence Number
Arrest – Law Enforcement Officer Number
Arrest – Law Enforcement Case Number
Arrest – Court Order Sequence Number
Arrest Time
Arrest Fingerprint Card Number
Arrest Bail Money
Arrest Fingerprint Flag
Arrest Prior Arrest Indicator
Arrest Weapon Code
Arrest Release Code
Arrest Release Date/Time
Arrest DUI Intoxicant Code
Arrest Processing Control Number
Arrest Amputated Bandaged Code
Arrest Fee Code
Arrest Arrestee Number
Arrest Resident Code
Arrest Fingerprinted Date
Arrest Arrestee Status Code
Arrest Response Request Flag
Arrest Transaction Suffix Number
Arrest Drug Code
Arrest Corrections Code
Arrest Comment Description
Arrest Date
Arrest Breath Analyzer Results Code
Arrest Type Code
Arrest Treated Adult Flag

ARREST OFFENSE

Definition: An offense for which an arrest was made.

Primary Key(s):

Arrest Offense Sequence Number
Arrest Offense – Agency ORI Number
Arrest Offense – Arrest Number

Attribute(s):

Arrest Offense – Offense Code
Arrest Offense General Character Code

Arrest Offense Disposition Date
Arrest Offense Disposition Code

ARREST/PROSECUTION CASE

Definition: This entity links an arrest to a prosecution case.

Primary Key(s):

Arrest/Prosecution Case – Prosecution Case Number
Arrest/Prosecution Case – Organization ID Number
Arrest/Prosecution Case – Agency ORI Number
Arrest/Prosecution Case – Arrest Number

Attribute(s):

(none)

ATTORNEY

Definition: Basic identifying information regarding an attorney (e.g., prosecutor).

Primary Key(s):

Attorney – Court Officer Sequence Number
Attorney – Agency ORI Number
Attorney – Identified Person SID Number

Attribute(s):

Attorney BAR Number
Attorney Code

BOAT

Definition: Basic identifying information about a specific boat.

Primary Key(s):

Boat Sequence Number

Attribute(s):

Boat Color Code
Boat Hull Serial Number
Boat Hull Shape Code
Boat Model Year
Boat Outer Hull Material Code
Boat Propulsion Type Code
Boat Type Code
Boat Make Code

BOOKING

Definition: Information regarding the booking of an arrestee.

Primary Key(s):

Booking Document Control Number
Booking – Agency ORI Number

Attribute(s):

Booking – Arrest Number

Booking Time

Booking Date

CHARGEDefinition: A charge filed by the prosecutor against an arrestee.Primary Key(s):

Charge Sequence Number

Charge – Prosecution Case Number

Attribute(s):

Charge – Offense Code

Charge Plea Code

Charge Treated Adult Flag

Charge Sealed Record Flag

Charge Disposition Code

Charge Disposition Date

Charge Count

Charge Version Code

Charge Offense General Character Code

CHARGE ACTIONDefinition: An action taken by the prosecutor regarding charges against an arrestee (e.g., filing).Primary Key(s):

Charge Action Sequence Number

Charge Action – Prosecution Case Number

Charge Action – Charge Sequence Number

Attribute(s):

Charge Action Code

Charge Action Date

CITATIONDefinition: Information regarding a citation issued by a law enforcement officer.Primary Key(s):

Citation Number

Citation – Agency ORI Number

Attribute(s):

Citation – Person Sequence Number

Citation – Person Name Sequence Number

Citation – Location Sequence Number

Citation – Identified Person SID Number

Citation – Law Enforcement Officer Number
Citation Weather Code
Citation Zone Type Code
Citation Traffic Code
Citation Posted Speed Number
Citation Narrative Description
Citation Actual Speed Number
Citation Court Code
Citation Time
Citation Date
Citation Type Code
Citation Light Code
Citation Disposition Code

CITATION OFFENSE

Definition: An offense for which a citation was issued.

Primary Key(s):

Citation Offense – Offense Code
Citation Offense – Citation Number
Citation Offense – Agency ORI Number

Attribute(s):

Citation Offense Count

CITY

Definition: A city.

Primary Key(s):

City Name
City – County Code
City – State/Province/Country Code

Attribute(s):

(none)

COMMITMENT ORDER

Definition: Information regarding a commitment order issued by the court.

Primary Key(s):

Commitment Order – Court Order Sequence Number
Commitment Order – Agency ORI Number

Attribute(s):

Commitment Order Number

CORRECTIONS AGENCY

Definition: Information regarding a corrections agency that takes custody of offenders.

Primary Key(s):

Agency ORI Number

Attribute(s):

(none)

CORRECTIONS EMPLOYEE

Definition: An employee of a correctional facility (corrections officer or probation officer).

Primary Key(s):

Corrections Employee Sequence Number

Corrections Employee – Organization ID Number

Corrections Employee – Identified Person SID Number

Corrections Employee – Agency ORI Number

Attribute(s):

Corrections Employee Type Code

CORRECTIONS OFFICER

Definition: Information regarding a corrections officer.

Primary Key(s):

Corrections Officer – Agency ORI Number

Corrections Officer – Identified Person SID Number

Corrections Officer – Corrections Employee Sequence Number

Corrections Officer Number

Attribute(s):

(none)

COUNTY

Definition: A county.

Primary Key(s):

County Code

County – State/Province/Country Code

Attribute(s):

County Name

County FIPS Code

COURT

Definition: Information regarding a criminal court.

Primary Key(s):

Court – Agency ORI Number

Attribute(s):

Court Calendar Code

Court Calendar Year
 Court Calendar Day
 Court Calendar Address
 Court Calendar Work Day Type Code
 Court Type Code
 Court Location Code

COURT CASE

Definition: Information regarding the court case in which an arrestee is tried.

Primary Key(s):

Court Case Number
 Court Case – Agency ORI Number

Attribute(s):

Court Case – Prosecutor Case Number
 Court Case – Identified Person SID Number
 Court Case Comment Description
 Court Case Disposition Code
 Court Case Trial Code
 Court Case Counsel Code
 Court Case PSI Due Date
 Court Case Appearance Code
 Court Case PSI Order Date
 Court Case Start Date
 Court Case Bond Effective Date
 Court Case Medical Evaluation Flag
 Court Case Hearing Type Code
 Court Case Psychological Evaluation Flag
 Court Case Name
 Court Case Hearing Date
 Court Case Dismissed Prejudice Code
 Court Case PSI Criminal History Ordered Date
 Court Case Dismissed Date
 Court Case Educational Evaluation Flag
 Court Case Defense Attorney – Court Officer Sequence Number
 Court Case Class Code
 Court Case Code
 Court Case Bond Expiration Date
 Court Case Appearance Time
 Court Case Appearance Date

Court Case Judgment Date

Court Case Status Code

Court Case Arraignment Date

Court Case Conviction Date

Court Case Sentence Date

COURT CASE EVENT

Definition: Information regarding an event that takes place during the course of a court case (e.g., a hearing).

Primary Key(s):

Court Case Event Sequence Number

Court Case Event – Court Case Number

Court Case Event – Agency ORI Number

Attribute(s):

Court Case Event Code

Court Case Event Adult Juvenile Code

Court Case Event Date

Court Case Event Time

COURT CASE EVENT ACTION

Definition: Information regarding actions that take place during or as a result of a court case event.

Primary Key(s):

Court Case Event Action Sequence Number

Court Case Event Action – Court Case Number

Court Case Event Action – Agency ORI Number

Court Case Event Action – Court Case Event Sequence Number

Attribute(s):

Court Case Event Action Code

Court Case Event Action Date

COURT OFFICER

Definition: An officer of the court (e.g., judge, attorney, probation officer).

Primary Key(s):

Court Officer Sequence Number

Court Officer – Agency ORI Number

Court Officer – Identified Person SID Number

Attribute(s):

Court Officer Type Code

COURT ORDER

Definition: A court order issued by the court.

Primary Key(s):

Court Order Sequence Number

Court Order – Agency ORI Number

Court Order – Organization ID Number

Court Order – Court Case Number

Attribute(s):

Court Order Type Code

Court Order Signed Date

CUSTODY

Definition: Information regarding an offender's satisfaction of the custody obligation imposed by the court.

Primary Key(s):

Custody Sequence Number

Custody – Identified Person SID Number

Custody – Person Sequence Number

Attribute(s):

Custody – Agency ORI Number

Custody – Court Case Number

Custody – Obligation Sequence Number

Custody Actual Release Date

Custody Actual Release Time

Custody Detainer Code

Custody Projected Release Date

Custody Parole Hearing Disposition Code

Custody Parole Hearing Date

Custody Reason Confined Code

Custody Sentence Scheduled Expiration Date

Custody Parole Eligibility Date
 Custody Institution Code
 Custody Sentence Actual Expiration Date
 Custody Interstate Corrections Compact Offense Literal Description
 Custody Interstate Corrections Compact Flag

CUSTODY INSTITUTION

Definition: Information regarding an offender's incarceration at a specific facility.

Primary Key(s):

Custody Institution – Custody Sequence Number
 Custody Institution – Identified Person SID Number
 Custody Institution – Person Sequence Number
 Custody Institution Sequence Number

Attribute(s):

Custody Institution Facility Code
 Custody Institution Intake Date
 Custody Institution Intake Time
 Custody Institution Abbreviation Code
 Custody Institution Release Date
 Custody Institution Release Time
 Custody Institution Release Reason Code

DISPOSED CHARGE

Definition: Information regarding a charge on which a disposition has been determined.

Primary Key(s):

Disposed Charge Sequence Number
 Disposed Charge – Sentence Order Number
 Disposed Charge – Court Case Number
 Disposed Charge – Agency ORI Number

Attribute(s):

Disposed Charge – Offense Code
 Disposed Charge Disposition Date
 Charge Disposition Code
 Disposed Charge Offense General Character Code

DRUG

Definition: A specific quantity of a specific drug.

Primary Key(s):

Drug – Agency ORI Number
 Drug – Property Sequence Number
 Drug – Incident Number

Attribute(s):

Drug Estimated Quantity Count

Drug Estimated Quantity Fraction

Drug Type Code

Drug Estimated Quantity Measurement Code

EMAILDefinition: An email address.Primary Key(s):

Email Address Description

Attribute(s):

None

FINANCIAL OBLIGATIONDefinition: Information regarding an offender's satisfaction of a financial obligation imposed by the court.Primary Key(s):

Financial Obligation – Court Order Sequence Number

Financial Obligation – Obligation Sequence Number

Financial Obligation – Agency ORI Number

Attribute(s):

(none)

GEOGRAPHICAL POSITIONDefinition: A specific location as identified by longitude and latitude.Primary Key(s):

Geographical Position – Location Sequence Number

Attribute(s):

Geographical Position Latitude Number

Geographical Position Longitude Number

IDENTIFIED PERSONDefinition: A person that has been positively identified (e.g., via fingerprints) and assigned a State Identification Number (SID).Primary Key(s):

Identified Person SID Number

Attribute(s):

Identified Person – Person Sequence Number

Identified Person Identification Comment Description

Identified Person Identification Method Code

Identified Person Fingerprint Card Type Code

Identified Person Fingerprint Class Finger Number

Identified Person Fingerprinted Reason Code

Identified Person FBI Number

Identified Person Fingerprint Class Code

IMAGE

Definition: A picture of a person or item.

Primary Key(s):

Image Sequence Number

Attribute(s):

Image – Person Sequence Number

Image Type Code

Image Photo Date

Image Photo Description

Image Subject Pose Code

Image NIST Digital Type of Transaction Code

 Incident Premise Neighborhood Code
 Incident Report Date
 Incident Report Date Indicator
 Incident Exceptional Clearance Date
 Incident Date
 Incident Time
 Incident Cleared Exception Code
 Incident Entry Method Code

INCIDENT BOAT

Definition: Information regarding a boat that was involved in a criminal incident.

Primary Key(s):

Incident Boat – Agency ORI Number
 Incident Boat – Incident Number
 Incident Boat – Incident Property Sequence Number
 Incident Boat – Boat Sequence Number

Attribute(s):

(none)

INCIDENT OFFENSE

Definition: A violation of the law (i.e., offense) that occurred during a criminal incident.

Primary Key(s):

Incident Offense – Incident Number
 Incident Offense – Agency ORI Number
 Incident Offense Sequence Number

Attribute(s):

Incident Offense – Offense Code
 Incident Offense General Character Code
 Incident Offense Attempted/Completed Code
 Incident Offense Automatic Weapon Indicator
 Incident Offense Criminal Activity Code
 Incident Offense Domestic Violence Flag

Incident Offense Drug Suspected Indicator
Incident Offense Gang Involvement Flag
Incident Offense Hate/Bias Code
Incident Offense Premises Entered Count
Incident Offense Weapon/Force Code

INCIDENT OFFENSE/PERSON

Definition: An associative entity that links an incident person to an offense.

Primary Key(s):

Incident Offense/Person – Incident Number
Incident Offense/Person – Agency ORI Number
Incident Offense/Person – Person Name Sequence Number
Incident Offense/Person – Person Sequence Number
Incident Offense/Person – Incident Offense Sequence Number

Attribute(s):

(none)

INCIDENT OTHER PROPERTY

Definition: Information regarding property (other than boat, vehicle, drug, jewelry, weapon, or security) that is involved in a criminal incident.

Primary Key(s):

Incident Other Property – Person Sequence Number
Incident Other Property – Other Property Sequence Number
Incident Other Property – Agency ORI Number
Incident Other Property – Incident Number
Incident Other Property – Property Sequence Number

Attribute(s):

(none)

INCIDENT PERSON

Definition: Information about a person that is true for a specific incident but is subject to change.

Primary Key(s):

Incident Person – Incident Number
Incident Person – Agency ORI Number
Incident Person – Person Sequence Number
Incident Person – Person Name Sequence Number

Attribute(s):

Incident Person Medical Condition Comment Description
Incident Person Height Number
Incident Person Comment Description
Incident Person Eye Color Code

Incident Person Glasses Code
 Incident Person Weight Number
 Incident Person Age Code
 Incident Person Right/Left Handed Code
 Incident Person Suspected Using Code
 Incident Person Danger Code
 Incident Person Type Code
 Incident Person Hair Color Code
 Incident Person Hair Description
 Incident Person Grade Code
 Incident Person Skin Tone Code
 Incident Person Jewelry Description
 Incident Person Citizenship Code
 Incident Person Dependents Count
 Incident Person Smoker Indicator
 Incident Person Resident Status Code
 Incident Person Religion Code
 Incident Person Sexual Preference Code
 Incident Person Education Years Count
 Incident Person Gang Affiliation Code
 Incident Person Marital Status Code
 Incident Person Gang Code
 Incident Person Language Code

INCIDENT PERSON INTEREST

Definition: Information regarding a person that is interest to law enforcement based on a criminal incident (e.g., witness).

Primary Key(s):

Incident Person Interest – Person Name Sequence Number
 Incident Person Interest – Person Sequence Number
 Incident Person Interest – Incident Number
 Incident Person Interest – Agency ORI Number

Attribute(s):

Incident Person Interest Type Code

INCIDENT PROPERTY

Definition: General information about a piece of property associated with an incident. Information specific to the piece of property is contained in another entity according to the property type (e.g., weapon, vehicle).

Primary Key(s):

Incident Property Sequence Number

Incident Property – Incident Number

Incident Property – Agency ORI Number

Attribute(s):

Incident Property Count

Incident Property Damage/Loss Value Money

Incident Property Recovery Value Money

Incident Property Value Money

Incident Property Type Code

Incident Property Recovery Date

Incident Property NCIC Code

Incident Property Circumstances Code

Incident Property Name

Incident Property Offense Code

INCIDENT PROPERTY LOCATION

Definition: Where, when, and why a specific incident property item is or was at a particular location.

Primary Key(s):

Incident Property Location – Agency ORI Number

Incident Property Location – Incident Number

Incident Property Location – Incident Property Sequence Number

Incident Property Location – Location Sequence Number

Attribute(s):

Incident Property Location Start Date

Incident Property Location Stop Date

Incident Property Location Reason Code

INCIDENT SECURITY

Definition: Information regarding financial securities involved in a criminal incident.

Primary Key(s):

Incident Security – Incident Number

Incident Security – Securities Sequence Number

Incident Security – Incident Property Sequence Number

Incident Security – Agency ORI Number

Attribute(s):

(none)

INCIDENT SUSPECT

Definition: Information regarding a person suspected in a criminal incident.

Primary Key(s):

Incident Suspect – Person Sequence Number

Incident Suspect – Person Name Sequence Number

Incident Suspect – Incident Number
 Incident Suspect – Agency ORI Number

Attribute(s):

Incident Suspect Number
 Incident Suspect Dangerous Flag

INCIDENT VEHICLE

Definition: Information about a specific vehicle for a specific incident, but that is subject to change.

Primary Key(s):

Incident Vehicle Sequence Number
 Incident Vehicle – Incident Property Sequence Number
 Incident Vehicle – Incident Number
 Incident Vehicle – Agency ORI Number

Attribute(s):

Incident Vehicle Abandoned Indicator
 Incident Vehicle Commercial Indicator
 Incident Vehicle Delinquent Payment Indicator
 Incident Vehicle Fire Indicator
 Incident Vehicle Hazardous Material Flag
 Incident Vehicle Key Needed Indicator
 Incident Vehicle Keys in Vehicle Indicator
 Incident Vehicle Locked Indicator
 Incident Vehicle Recovered Condition Code
 Incident Vehicle Recovered Date
 Incident Vehicle Consent Indicator
 Incident Vehicle Impound Indicator
 Incident Vehicle Towed To Name
 Incident Vehicle Towed By Name
 Incident Vehicle Driver Bag Indicator
 Incident Vehicle Damage Comment Description
 Incident Vehicle Direction Code
 Incident Vehicle Disposition Code
 Incident Vehicle Driveable Indicator
 Incident Vehicle Estimated Damage Money
 Incident Vehicle Impact Point Code
 Incident Vehicle Movement Code
 Incident Vehicle Detail Comment Description
 Incident Vehicle Damage Area Code
 Incident Vehicle Deformity Extent Code

Incident Vehicle Passenger Bag Indicator

INCIDENT VEHICLE DAMAGE

Definition: Information regarding damage to a vehicle resulting from a criminal incident.

Primary Key(s):

Incident Vehicle Damage Area Code

Incident Vehicle Damage – Incident Number

Incident Vehicle Damage – Agency ORI Number

Incident Vehicle Damage – Incident Property Sequence Number

Incident Vehicle Damage – Incident Vehicle Sequence Number

Attribute(s):

Incident Vehicle Damage Comment Description

Incident Vehicle Damage Deformity Extent Code

INCIDENT VICTIM

Definition: A victim of a criminal incident.

Primary Key(s):

Incident Victim – Agency ORI Number

Incident Victim – Incident Number

Incident Victim – Person Sequence Number

Incident Victim – Person Name Sequence Number

Attribute(s):

Incident Victim Relationship Offender Code

Incident Victim Resident Indicator

Incident Victim Justifiable Homicide Code

Incident Victim Homicide Circumstances Code

Incident Victim LEOKA Activity Code

Incident Victim Suspect Number

Incident Victim LEOKA Assignment Code

Incident Victim LEOKA Act Code

Incident Victim Circumstances Code

Incident Victim Type Code

Incident Victim Aggravated Assault Code

Incident Victim Number

INCIDENT VICTIM INJURY

Definition: Information regarding an injury sustained by the victim of a specific incident.

Primary Key(s):

Incident Victim Injury Number

Incident Victim Injury – Person Name Sequence Number

Incident Victim Injury – Incident Number

Incident Victim Injury – Agency ORI Number
 Incident Victim Injury – Person Sequence Number

Attribute(s):

Incident Victim Injury Code

INCIDENT WEAPON

Definition: Information regarding a weapon used in a specific incident.

Primary Key(s):

Incident Weapon – Agency ORI Number
 Incident Weapon – Incident Number
 Incident Weapon – Incident Property Sequence Number
 Incident Weapon – Weapon Sequence Number

Attribute(s):

(none)

INTERSECTION

Definition: The component of Location that is identified by two cross streets.

Primary Key(s):

Intersection – Location Sequence Number

Attribute(s):

Intersection Primary Street – Street Sequence Number
 Intersection Cross Street – Street Sequence Number

JEWELRY

Definition: Information specifically relating to an article of jewelry.

Primary Key(s):

Jewelry – Property Sequence Number
 Jewelry – Incident Number
 Jewelry – Agency ORI Number

Attribute(s):

Jewelry Necklace/Bracelet Width Count
 Jewelry Ring Size Number
 Jewelry Necklace/Bracelet Length Count
 Jewelry Metal Content Code
 Jewelry Total Weight Count
 Jewelry Sex Code
 Jewelry Size/Style Code
 Jewelry Type Code
 Jewelry Metal Color Code
 Jewelry Metal Code
 Jewelry Link Style Description

JEWELRY STONE

Definition: Details about the type of gem or pearl associated with a piece of jewelry.

Primary Key(s):

Jewelry Stone – Incident Number

Jewelry Stone – Agency ORI Number

Jewelry Stone – Property Sequence Number

Jewelry Stone Sequence Number

Attribute(s):

Jewelry Stone Width Count

Jewelry Stone Length Count

Jewelry Stone Count

Jewelry Stone Type Code

Jewelry Stone Shape Code

Jewelry Stone Transparency Code

Jewelry Stone Weight/Carat Count

Jewelry Stone Color Code

Jewelry Stone Code

JUDGE

Definition: Information regarding a judge that hears criminal cases.

Primary Key(s):

Judge – Court Officer Sequence Number

Judge – Identified Person SID Number

Judge – Agency ORI Number

Attribute(s):

Judge Number

LAW

Definition: Reference to criminal law in the state. The Law Sequence Number is used to reference all state and local laws (e.g., revised statutes, local ordinances, administrative codes).

Primary Key(s):

Law Sequence Number

Attribute(s):

Law Reference Code

Law Effective Date

Law Discontinued Date

Law Abbreviated Description

Law Crime Group Code

Law Felony Severity Code

Law Person Code

Law Full Description

Law FBI Submission Flag

Law Statute File Status Code

Law Misdemeanor Class Code

Law Crime Type Code

Law Chapter Number

Law Section Number

Law Subsection 1 Number

Law Subsection 2 Number

Law Subsection 3 Number

Law Subsection 4 Number

LAW ENFORCEMENT AGENCY

Definition: A specific law enforcement agency within the state (e.g., sheriff's office, police department, state patrol).

Primary Key(s):

Law Enforcement Agency – Agency ORI Number

Attribute(s):

(none)

LAW ENFORCEMENT CASE

Definition: The incident/arrest case compiled by the law enforcement agency.

Primary Key(s):

Law Enforcement Case – Agency ORI Number

Law Enforcement Case Number

Attribute(s):

Law Enforcement Case – Incident Number

Law Enforcement Case – Identified Person SID Number

Law Enforcement Case – Law Enforcement Officer Number

LAW ENFORCEMENT OFFICER

Definition: A law enforcement officer as identified by a unique number (e.g., badge number).

Primary Key(s):

Law Enforcement Officer – Agency ORI Number

Law Enforcement Officer – Identified Person SID Number

Law Enforcement Officer Number

Attribute(s):

(none)

LOCATION

Definition: A place identified by Site Address, Intersection, Road Segment, or Geographic Position (longitude and latitude).

Primary Key(s):

Location Sequence Number

Attribute(s):

Location – City Name

Location – Street Sequence Number

Location – County Code

Location – State/Province/Country Code

Location Type Code

Location Private Property Indicator

Location One-Way Street Indicator

Location Posted Speed Limit

Location Road Character Code

Location Road Through Lanes Code

Location Code

OBLIGATION

Definition: An offender's obligation (financial, supervision, custody) according to the sentence order.

Primary Key(s):

Obligation Sequence Number

Obligation – Court Case Number

Obligation – Identified Person SID Number

Obligation – Person Sequence Number

Obligation – Agency ORI Number

Attribute(s):

Obligation – Sentence Order Number

Obligation – Disposed Charge Sequence Number

Obligation Type Code

Obligation Satisfaction Date

OFFENSE

Definition: This entity cites specific violations of the law for reference by other entities (e.g., incident, arrest, charge).

Primary Key(s):

Offense Code

Attribute(s):

Offense – Law Sequence Number

Offense Severity Code

Offense Description

ORGANIZATION

Definition: A business or government agency.

Primary Key(s):

Organization ID Number

Attribute(s):

Organization Type Code

Organization Name

ORGANIZATION LOCATION

Definition: The location (address) of the organization.

Primary Key(s):

Organization Location Start Date

Organization Location – Organization ID Number

Organization Location – Location Sequence Number

Attribute(s):

Organization Location Stop Date

ORGANIZATION TELEPHONE

Definition: The telephone number associated with a specific organization.

Primary Key(s):

Organization Telephone Start Date/Time

Organization Telephone – Organization ID Number

Organization Telephone – Telephone Sequence Number

Attribute(s):

Organization Telephone Stop Date/Time

Organization Telephone Type Code

OTHER PROPERTY

Definition: Information about a specific piece of property that is not a vehicle, boat, drug, security, or weapon.

Primary Key(s):

Other Property Sequence Number

Attribute(s):

Other Property – Person Sequence Number

Other Property Owner Applied Number

Other Property Partial Serial Number Indicator

Other Property Model Name

Other Property Manufactured Year

Other Property Style Name

Other Property Serial Number

Other Property Size Description

Other Property Description

Other Property Age Years

 Other Property Engraving Description
 Other Property Color Code

PAROLE

Definition: Information regarding an offender's parole.

Primary Key(s):

Parole – Supervision Sequence Number
 Parole – Person Sequence Number
 Parole – Identified Person SID Number

Attribute(s):

Parole – Agency ORI Number
 Parole – Corrections Employee Sequence Number
 Parole Special Condition Code
 Parole Type Code
 Parole Discharge Type Code
 Parole Revocation Date
 Parole Revocation Type
 Parole Officer Number
 Parole Discharge Date

PAROLE OFFICER

Definition: Information regarding a parole officer.

Primary Key(s):

Parole Officer – Person Sequence Number
 Parole Officer – Agency ORI Number
 Parole Officer – Corrections Employee Sequence Number
 Parole Officer – Identified Person SID Number

Attribute(s):

(none)

PAROLE VIOLATION

Definition: Information regarding a specific violation of the offender's parole conditions.

Primary Key(s):

Parole Violation Date
 Parole Violation – Identified Person SID Number
 Parole Violation – Supervision Sequence Number
 Parole Violation – Person Sequence Number

Attribute(s):

Parole Violation Type Code

PERSON

Definition: Information about a specific person that is not likely to change.

Primary Key(s):

Person Sequence Number

Attribute(s):

Person Blood Type Code

Person Custody Status Code

Person CHRI Number

Person Death Date/Time

Person Deceased Code

Person Ethnicity Code

Person Fingerprint Indicator

Person Juvenile ID Number

Person Law Enforcement Employee Indicator

Person Race Code

PERSON DNA

Definition: Information regarding the collection of a DNA sample from a person.

Primary Key(s):

Person DNA Date

Person DNA – Person Sequence Number

Attribute(s):

Person DNA Agency ORI Number

PERSON DOB

Definition: Birth date information associated with a person.

Primary Key(s):

Person Sequence Number

Person DOB Birth Date

Attribute(s):

(none)

PERSON DRIVER LICENSE

Definition: A driver license associated with a person.

Primary Key(s):

Person Driver License Sequence Number

Person Driver License – Person Name Sequence Number

Person Driver License – Person Sequence Number

Attribute(s):

Person Driver License State – State/Province Code

Person Driver License Withdrawal Effective Date

Person Driver License Withdrawal Reinstatement Date

Person Driver License Withdrawal Eligibility Date

Person Driver License Classification Code

Person Driver License Expiration Year

Person Driver License Withdrawal Code

Person Driver License Withdrawal Reason Code

Person Driver License Withdrawal Extent Code

Person Driver License Non-CDL Status Code

Person Driver License CDL Status Code

Person Driver License Number

Person Driver License Expiration Date

Person Driver License Issue Date

PERSON DRIVER PERMIT

Definition: A driver permit associated with a person.

Primary Key(s):

Person Driver Permit Issue Date

Person Driver Permit – Person Name Sequence Number

Person Driver Permit – Person Sequence Number

Attribute(s):

Person Driver Permit Restriction Code

Person Driver Permit Restriction End Date

Person Driver Permit Code

Person Driver Permit Restriction Comment

Person Driver Permit Expiration Date

PERSON EMAIL

Definition: An email address associated with a person.

Primary Key(s):

Person Email Start Date

Person Email – Email Sequence Number

Person Email – Person Name Sequence Number

Person Email – Person Sequence Number

Attribute(s):

Person Email Stop Date

PERSON EMPLOYER

Definition: When a person worked for a specific employer.

Primary Key(s):

Person Employer – Organization ID Number

Person Employer – Person Sequence Number

Person Employer Start Date

Attribute(s):

Person Employer Stop Date

Person Employer Comment Description

PERSON LOCATION

Definition: Where a specific person was located and when.

Primary Key(s):

Person Location Start Date

Person Location – Location Sequence Number

Person Location – Person Sequence Number

<u>Attribute(s):</u> Person Location Stop Date Person Location Type Code
PERSON MISC NUMBER <u>Definition:</u> A number associated with a person. <u>Primary Key(s):</u> Person Misc Number – Person Sequence Number Person Misc Number <u>Attribute(s):</u> Person Misc Number Code Person Misc Number Comment
PERSON NAME <u>Definition:</u> A name associated with a person. <u>Primary Key(s):</u> Person Name Sequence Number <u>Attribute(s):</u> Person Name – Person Sequence Number Person Name First Name Person Name Last Name Person Name Suffix Name Person Name Soundex Code Person Name Middle Name Person Name Use Code Person Name Complete Name Person Name Date
PERSON OCCUPATION <u>Definition:</u> An occupation associated with a person. <u>Primary Key(s):</u> Person Occupation Sequence Number Person Occupation – Person Sequence Number <u>Attribute(s):</u> Person Occupation Type Code Person Occupation Additional Description Person Occupation Date
PERSON/ORG/ADDRESS TELEPHONE <u>Definition:</u> A telephone number associated with a particular person, organization, and address. <u>Primary Key(s):</u> Person/Org/Address Telephone – Telephone Number

Person/Org/Address Telephone – Location Sequence Number
 Person/Org/Address Telephone – Person Name Sequence Number
 Person/Org/Address Telephone – Person Sequence Number
 Person/Org/Address Telephone – Organization ID Number
Attribute(s):
 Telephone Type Code
 Telephone Extension Number

PERSON/ORGANIZATION EMAIL

Definition: An email address associated with a specific person and organization.

Primary Key(s):

Organization Email – Organization ID Number
 Person/Organization Email – Person Name Sequence Number
 Person/Organization Email – Person Sequence Number
 Organization Email – Email Address Description

Attribute(s):

(none)

PERSON SMT

Definition: Scars, marks, tattoos, or amputations that a person possesses.

Primary Key(s):

Person SMT Sequence Number
 Person Sequence Number

Attribute(s):

Person SMT Code
 Person SMT Additional Description
 Person SMT Tattoo Class Code
 Person SMT Tattoo Color
 Person SMT Location Code
 Person SMT Size
 Person SMT Source

PERSON SSN

Definition: A social security number associated with a person.

Primary Key(s):

Person SSN Sequence Number
 Person SSN – Person Sequence Number

Attribute(s):

Person SSN Number
 Person SSN Use Code

PERSON TELEPHONE

Definition: A telephone number associated with a person.

Primary Key(s):

Person Telephone Start Date

Person Telephone – Telephone Sequence Number

Person Telephone – Person Sequence Number

Attribute(s):

Person Telephone Stop Date

Person Telephone Type Code

PROBATION

Definition: Information regarding an offender's probation.

Primary Key(s):

Probation – Identified Person SID Number

Probation – Supervision Sequence Number

Probation – Person Sequence Number

Attribute(s):

Probation – Court Officer Sequence Number

Probation – Agency ORI Number

Probation End Date

Prosecution Case Bond Money

PROTECTION ORDER

Definition: Information regarding a protection order issued by the court.

Primary Key(s):

Protection Order – Court Order Sequence Number

Protection Order – Agency ORI Number

Attribute(s):

Protection Order – Person Name Sequence Number

Protection Order – Person Sequence Number

Protection Order Condition Code

Protection Order Expiration Date
Protection Order Number
Protection Order Status Code
Protection Order Person Type Code

REGISTERED BOAT

Definition: Information regarding the registration of a boat with the state.

Primary Key(s):

Registered Boat Registration Date
Registered Boat – Person Sequence Number
Registered Boat – Person Name Sequence Number
Registered Boat – Boat Sequence Number

Attribute(s):

Registered Boat Name

REGISTERED GUN

Definition: Information regarding the registration of a gun with the state.

Primary Key(s):

Registered Gun Registration Date
Registered Gun – Person Sequence Number
Registered Gun – Person Name Sequence Number
Registered Gun – Weapon Sequence Number

Attribute(s):

(none)

REGISTERED SECURITY

Definition: Information regarding the registration of a financial security.

Primary Key(s):

Registered Security Registration Date
Registered Security – Person Name Sequence Number
Registered Security – Person Sequence Number
Registered Security – Securities Sequence Number

Attribute(s):

(none)

REGISTERED VEHICLE

Definition: Information regarding the registration of a vehicle with the state.

Primary Key(s):

Registered Vehicle License Plate Number

 Sentence Special Probation Condition Flag
 Sentence Confinement Code
 Sentence Post Release Period Months
 Sentence Jail Time Credit Days
 Sentence Recap Comment
 Sentence Death Flag

STATE/PROVINCE/COUNTRY

Definition: A state, province or country.

Primary Key(s):

State/Province/Country Code

Attribute(s):

State/Province/Country Name

STREET

Definition: A street, including its name and upper and lower address ranges.

Primary Key(s):

Street Sequence Number

Attribute(s):

Street ID Number

Street Lower Range Number

Street Upper Range Number

Street Name

Street Post Direction Code

Street Pre Direction Code

Street Suffix Code Street Type Code
STREET ALIAS <u>Definition:</u> An alternative name a street is known by. <u>Primary Key(s):</u> Street Alias Name Street Alias – Street Sequence Number <u>Attribute(s):</u> (none)
STREET SEGMENT REFERENCE <u>Definition:</u> The component of Location that is identified by beginning and ending milepost numbers. <u>Primary Key(s):</u> Street Segment Reference – Location Sequence Number <u>Attribute(s):</u> Street Segment Reference Distance Measure Street Segment Reference Distance Unit Code Street Segment Reference Object Name Street Segment Reference Direction Code
SUPERVISION <u>Definition:</u> General information about an offender's supervision (probation or parole). <u>Primary Key(s):</u> Supervision Sequence Number Supervision – Identified Person ID Number Supervision – Person Sequence Number <u>Attribute(s):</u> Supervision – Agency ORI Number Supervision – Court Case Number Obligation Sequence Number Supervision Type Code
SUPERVISION OBLIGATION <u>Definition:</u> General information about an offender's supervision (probation or parole). <u>Primary Key(s):</u> Supervision – Obligation Sequence Number Supervision – Agency ORI Number Supervision – Court Order Sequence Number <u>Attribute(s):</u> Supervision Type Code Supervision Status Date

Supervision Probation Expiration Date
Supervision Release Start
Supervision Release Date

TELEPHONE

Definition: A telephone number and extension.

Primary Key(s):

Telephone Number

Attribute(s):

(none)

VEHICLE

Definition: Basic identifying information about a specific vehicle.

Primary Key(s):

Vehicle Sequence Number

Attribute(s):

Vehicle Air Bag Available Code

Vehicle Identification Number

Vehicle Make Code

Vehicle Make Description

Vehicle Model Code

Vehicle Model Year

Vehicle Partial Identification Number Indicator

Vehicle Style Code

Vehicle Sub Year Indicator

Vehicle Type Code

Vehicle Engine Power Count

Vehicle Engine Power Measurement Code

WARRANT

Definition: Information about a warrant issued by the court.

Primary Key(s):

Warrant Number

Warrant – Agency ORI Number

Attribute(s):

Warrant – Court Case Number

Warrant – Incident Number

Warrant – Person Name Sequence Number

Warrant – Person Sequence Number

Warrant – Incident Offense Sequence Number

Warrant Type Code

Warrant Expiration Date

WEAPON

Definition: Identifying information about a specific weapon.

Primary Key(s):

Weapon Sequence Number

Attribute(s):

Weapon Altered Description

Weapon Altered Indicator

Weapon Barrel/Blade Length Measurement Count

Weapon Caliber Code

Weapon Engraving Description

Weapon Finish Code

Weapon Gauge Code

Weapon Grip Description

Weapon Make Code

Weapon Make Description

Weapon Miscellaneous Description

Weapon Model Description

Weapon Model Number

Weapon NCIC Action Type Code

Weapon NCIC Type Code

Weapon Overall Length Measurement Count

Weapon Owner Applied Number

Weapon Partial Serial Number Indicator

Weapon Serial Number

Weapon Shotgun Caliber Code

V. DATA ELEMENT DICTIONARY

V. DATA ELEMENT DICTIONARY

This section presents the CJIS Data Element Dictionary. It summarizes the content and format of the dictionary and lists the standard data elements that have been defined for exchange of CJIS data.

For each data element listed in the dictionary, the following information is provided:

- *Name of Data Element* – Naming of data elements is based upon recognized data administration practices. Included at the end of each name is a data element class word that can be matched to the global data types.
- *Definition* – A description or definition of the data element provided in relationship to other data elements and the criminal justice process.
- *Data Type/Length* – This entry describes the format for coding the data based upon an approved list of class words or global data types. For example, the format and length of a data element with the name ending in a class word of DATE will be defined by the DATE data type, and a data element with the name ending in a class word of NUMBER will be defined by the NUMBER data type of VARCHAR and its specified length.
- *Source of Definition* – Many definitions are based on material from other standards or systems. Known sources for these references are listed.
- *Source of Element* – This field or entry identifies the primary documents, forms, or collectors of the data.
- *Synonyms* – Other terms or field identifiers that are sometimes used in place of a data element name are listed as synonyms.
- *Source of Code* – Many codes in this dictionary are based on national standards or on codes used in existing data systems. This field or entry cites the source of the codes listed in the dictionary.
- *Codes* – For each data element, permissible codes are listed with their interpretation or descriptions.
- *XML Data Tag* – This field identifies the equivalent data element detailed in the Justice XML Data Dictionary Version 1.1.
- *Notes* – This contains any additional comments regarding the data element.

APPENDIX A
SYSTEM LISTINGS

STATE OF NORTH DAKOTA
CRIMINAL JUSTICE INFORMATION SHARING
Existing Information Systems

TITLE	SYSTEM NAME	OWNER
AFIS	Automated Fingerprint Identification System The computer system which is maintained by the FBI for IAFIS.	FBI
CAS	Case Management System	AG
CCH	Criminal History and Offender Registration	BCI
DOCSTAR	Department of Correction STAR	DOC
HP	Highway Patrol	Highway Patrol
III	Interstate Identification Index The computer system maintained by the FBI which contains the Interstate Identification Index records.	FBI
JPS XML	Justice and Public Safety XML Version .05	
JUS XML	Justice XML Version 1.1	NLETS
NCIC	National Crime Information Center An on-line information service provided by the FBI to criminal justice agencies across the United States, Puerto Rico, the US Virgin Islands, Mexico, and Canada.	FBI
ND NIBRS	North Dakota NIBRS	BCI
NIBRS	National Incident Based Reporting System NIBRS is an incident-based reporting system. Data are collected on each single crime occurrence. NIBRS data are designed to be generated as a byproduct of local, state, and Federal automated records systems. This information is collected by the FBI as a part of the Uniform Crime Reporting program.	FBI

APPENDIX B
DATA ELEMENT LISTING

STATE OF NORTH DAKOTA
CRIMINAL JUSTICE INFORMATION SHARING
Data Element Listing For AFIS

SYSTEM FILE	DATA ELEMENT NAME	FORMAT	DESCRIPTION	ID	STANDARD ELEMENT
Electronic Latent Submission	ACTION TO BE TAKEN	0-300/ANS	This field is used in free text answers to submission requests to indicate that a latent case will be established or to indicate recommendations for further actions.	0	Unsharable
Electronic Latent Submission	AGE RANGE	4/N	An estimated age range may be entered using a pair of two-digit numbers.	5	Incident Person Age Code
Electronic Latent Submission	ARREST OFFENSE LITERAL	1-300/AN	The field contains free text description of an offense charged on an arrest.	504	Incident Description
Electronic Latent Submission	ATTENTION INDICATOR	3-30/AN	This field shall contain a designation of the individual to whose attention a response it to be directed.	302	Person Name First Name
Electronic Latent Submission	CASE TITLE	4-50/ANS	This field identifies the Latent Case. It will include information concerning the case and it must include the offense type.	0	Unsharable
Electronic Latent Submission	COLOR EYES	3/A	For this field, the three-letter code from the following table is used to indicate the subject's color of eyes.	11	Incident Person Eye Color Code
Electronic Latent Submission	CONTRIBUTOR CASE IDENTIFICATION NUM	24-48/AN	This field is a 48-byte maximum alphanumeric assigned by the contributor to uniquely identify a latent case.	0	Unsharable
Electronic Latent Submission	CONTRIBUTOR CASE IDENTIFIER EXTENSI	2/N	This field is a two-byte numeric supplement to the Case Identifier Number that allows multiple searches to be associated with the same case.	0	Unsharable
Electronic Latent Submission	DATE OF OFFENSE	8/N	This field contains the date of offense. The DOO and AOL comprise the arrest segment of the arrest data.	38	Incident Begin Date/Time
Electronic Latent Submission	DATE PRINTED	8/N	This field contains the date that the subject was fingerprinted.	209	Booking Date/Time
Electronic Latent Submission	FBI FILE NUMBER	10/NS	This is a 10-byte numeric representing the FBI Investigative File Number.	407	Incident FBI File Number
Electronic Latent Submission	FBI LATENT CASE EXTENSION	6/AN		0	Unsharable

STATE OF NORTH DAKOTA
CRIMINAL JUSTICE INFORMATION SHARING
Data Element Listing For AFIS

SYSTEM FILE	DATA ELEMENT NAME	FORMAT	DESCRIPTION	ID	STANDARD ELEMENT
Electronic Latent Submission	FBI LATENT CASE NUMBER	1-9/AN		0	Unsharable
Electronic Latent Submission	GENDER	1/A	This field is used to report the gender of the subject.	23	Person Sex Code
Electronic Latent Submission	GEOGRAPHICAL AREA OF SEARCH	2/A	This field indicates the geographic area to be searched.	0	Unsharable
Electronic Latent Submission	HAIR COLOR	3/A	In this field, the three-letter code from the table is used to indicate the subject's color of hair.	12	Incident Person Hair Color Code
Electronic Latent Submission	HEIGHT RANGE	6/N	If a range of height is given, it shall be expressed as two three-character values formatted as described for mnemonic HGT, indicating the shortest and tallest heights of the subject.	13	Incident Person Height Number
Electronic Latent Submission	IMAGE DESIGNATION CHARACTER	2/N	The Image Designation Character shall be a sequentially assigned positive integer starting from zero and increasing by one for each finger position, image, or Type-2 record present.	0	Unsharable
Electronic Latent Submission	IMAGE PREPROCESSING	1/AN	This field is used to indicate whether the image is original or compressed.	0	Unsharable
Electronic Latent Submission	IMAGE PROCESSING FIELD	100/AN	This free text field is used to log the make, model, and serial number of the equipment used to acquire images.	0	Unsharable
Electronic Latent Submission	IMAGE RECORD TYPE DESIRED	1/N	This field is used in transactions involving a request for fingerprint image information.	0	Unsharable
Electronic Latent Submission	IMAGE TYPE	2/A	This field identifies the type of image (e.g., palm prints, toe prints) included in an electronic submittal.	0	Unsharable
Electronic Latent Submission	LENGTH	4/N	This field contains the length of the logical record specifying the total number of bytes, including every character of every field contained in the record.	0	Unsharable

STATE OF NORTH DAKOTA
CRIMINAL JUSTICE INFORMATION SHARING
Data Element Listing For AFIS

SYSTEM FILE	DATA ELEMENT NAME	FORMAT	DESCRIPTION	ID	STANDARD ELEMENT
Electronic Latent Submission	MILITARY CODE	1/A	A one-letter code from the table shall be entered in this field to indicate which branch of the United States Military submitted the transaction.	0	Unsharable
Electronic Latent Submission	MISCELLANEOUS IDENTIFICATION NO.	4-15/ANS	If there are any miscellaneous identification numbers, they shall be entered in this field.	0	Unsharable
Electronic Latent Submission	NCIC FINGERPRINT CLASSIFICATION	2-20/A		326	Identified Person Fingerprint Class Code
Electronic Latent Submission	OFFENSE CATEGORY	1/N	This field shall contain a "1" for a crime categorized as a personal, a "2" for one categorized as property, and a "3" for one categorized as both.	0	Unsharable
Electronic Latent Submission	PATTERN LEVEL CLASSIFICATION	2-20/AN	This field contains information about the finger(s) pattern types.	326	Identified Person Fingerprint Class Code
Electronic Latent Submission	PLACE OF BIRTH	2/AS	The subject's place of birth shall be entered in this field.	2	State/Province/Country Code
Electronic Latent Submission	RACE	1/A	This field is used to indicate the race of the subject.	21	Person Race Code
Electronic Latent Submission	REQUEST FOR CRIMINAL HISTORY	1/A	The purpose of this field is to allow the contributors to optionally request any criminal history data, e.g. rap sheet the FBI has on file.	0	Unsharable
Electronic Latent Submission	SCARS, MARKS, TATTOOS	3-10/A	For each scar, mark, or tattoo present on the subject, the appropriate NCIC code shall be used in this information item.	525	Person SMT Code
Electronic Latent Submission	SEND COPY TO	9-19/AN	The purpose of this field is to indicated requirements for production of additional response(s) for a receiving agency other than the contributor.	302	Person Name First Name
Electronic Latent Submission	WEIGHT RANGE	3/N	If a range of weight is given, it shall be expressed as two 3-digit numbers indicating the minumum and maximum wieghts (in pounds) of the subject.	33	Incident Person Weight Number
